

SUBWAY EXTENSION

CONSTRUCTION UPDATE #26

9 January 2012

WORK TO COMMENCE ON SITE ADJACENT TO SCHULICH SCHOOL OF BUSINESS

Starting on 10 January 2012, preparation work will begin for the removal of the damaged rigs on the site immediately to the north of the Schulich School of Business. The Ministry of Labour have asked the TTC and its contractors to remove the damaged equipment.

These preparations, which will continue until this Friday, 13 January 2012, will not likely require the use of heavy equipment apart from forklifts. Activities will involve working on the damaged pieces of equipment

Once plans are complete for the removal of the damaged equipment, a subsequent communication will be issued.

Courtesy Foster and Partners

The Toronto-York Spadina Subway Extension (TYSSE) will extend the TTC subway system from Downsview Subway Station to the City of Vaughan, with two stations on campus: York University and Steeles West. The subway's arrival will alter the York experience, vastly improve how thousands of people commute daily, and will integrate York more fully into its surrounding communities.
