

SUBWAY EXTENSION

CONSTRUCTION UPDATE #31

19 April 2012

Temporary Construction Entrance on Ian Macdonald Blvd

From Monday, April 23rd to Friday, April 27th, construction vehicles at the York University station site will be entering the north end of the site through a temporary construction entrance located at Ian Macdonald Boulevard opposite the York Research Tower and the Archives of Ontario Building, south of Vanier Lane.

Flag personnel will be on site to assist with pedestrians using the walkway and to direct construction traffic.

Some traffic congestion may be experienced along on the York Boulevard parking lot detour road while this temporary construction entrance is being used.

Courtesy Foster and Partners

The Toronto-York Spadina Subway Extension (TYSSE) will extend the TTC subway system from Downsview Subway Station to the City of Vaughan, with two stations on campus: York University and Steeles West. The subway's arrival will alter the York experience, vastly improve how thousands of people commute daily, and will integrate York more fully into its surrounding communities.
